

ProTime

The Smarter Plug and Play Time & Attendance Solution for Small to Medium size Companies.

"Simplicity"

Simply Reliable

Simply Affordable

Simply ProTime

Complete clocking in solution in one Box

Following on the success of TimeVision, the New Smarter Plug and Play Time and Attendance solution is here. Ready to fit straight from the box, ProTime offers a simple yet smart solution for small to medium size companies wanting to monitor and manage their staff in a cost effective and efficient manner.

Award winning design

Based on the award winning design concept that made TimeVision undoubtedly the most popular entry level product in the market, ProTime was developed to cater for companies up to 100 employees giving you exactly what you expect from a Time and Attendance System without all the fuss and complexity.

Simplicity itself

ProTime merges the latest high tech advances with great flexibility, yet it is simplicity itself. The easily installed terminal and instantly useable software interface ensure that the system can be painlessly introduced to your office environment.

Simply the best value available

ProTime is a complete hardware and software solution that fits easily into your business structure and gives you greater control over your staff. Whether it is for a single or a multi-clocking terminal operation, ProTime is the ideal solution for your company and its affordable price makes it suitable for any pocket.
