

secondary clocks

ECO

Time is money. With our ECO models, you get a lot of time for very little money. ECO secondary clocks are elegant and fit in with any surroundings. They can be quickly put into operation as independent battery-operated quartz clocks or radio-controlled wall clocks. ECO clocks can

also be used in a self-setting MOBALine clock installation. If you simply want to install a conventional one minute pulse time system at low cost, there's no problem. ECO secondary clocks can be installed in various ways and are built to high professional standards. Why not your next choice ?

ECO secondary clocks

We can supply the ECO clocks with various mechanisms.

A:

With minute pulse movement for conventional minute pulse installations, 24 to 60 V.

DQ:

With battery powered movement for quartz clock operation. Powered by a 1.5 V battery (IEC LR 6). Battery not included.

FWU:

With radio controlled movement and built-in receiver antenna for independent operation with a 1.5 V battery (IEC LR 6). Battery not included. With black hour and minute hands and red second hand.

SAM:

With MOBALine movement for operation as self-setting secondary clocks.

SEM:

With MOBALine movement for operation as self-setting secondary clocks with black hour and minute hands and red second hand.

Available in sizes of 30 cm and 40 cm diameter and with two different dial variants.

Type 200

Type 210

The standard colour of the case is white.

As an accessory, a mounting kit is available for mounting two ECO clocks to form a double sided clock. The flange used allows wall or ceiling mounting.
